## The 3 Types of replacement kits:

### OE Sensor Service Kit

This service kit is for OE TPMS Sensors with Aluminum Valve Stems. The typical kit consists of a hex nut, grommet (seal) valve core and dust cap.

**NEVER** reuse the existing components! Always replace these items to prevent failure, leaks and corrosion.

**ALWAYS** use the appropriate tools when assembling and adhere to all torque specifications.

### OE Sensor Aluminum Valve Kit

This service kit is for OE TPMS Sensors with replaceable aluminum valves. The typical kit consists of a new valve, grommet (seal), hex nut, valve core, screw and dust cap.

**NEVER** reuse the existing components! Always replace these items to prevent failure, leaks and corrosion.

**ALWAYS** use the appropriate tools when assembling and adhere to all torque specifications.

### OE Sensor Rubber Valve Kit

This service kit is for OE TPMS Sensors with replaceable rubber valves. The typical kit consists of a new valve, valve core, screw and dust cap.

**NEVER** reuse the existing components! Always replace these items to prevent failure, leaks and rubber decay.

**ALWAYS** use the appropriate tools when assembling and adhere to all torque specifications.
