

BARTEC TOOL FEATURE SPOTLIGHT

FEATURE: Schrader Single EZ-sensor

BENEFIT: Market First Coverage for this new sensor

FIRST AVAILABLE: Software update 53.1 [July 2015]

WHAT TOOLS: Tech400Pro, Tech300Pro, Tech500, Tech400SD, and Tech400+

Bartec TPMS tools were the very first to feature “at the car” programming of aftermarket TPMS replacement sensors. With the recent launch of tool update 53.1 Bartec added the ability to program the new single EZ-sensor

Simply select the appropriate Make - Model - and Year, and the tool does the rest by programming and setting the Intellisens Sensor.

According to Schrader:

- This new single sensor solution for TPMS combines 314.9 MHz, 315 MHz and 433 MHz together into ONE easy-to-program TPMS sensor.
- Along with the OE quality you expect from Schrader, the new EZ-sensor supports new and pending OE system technologies, including auto-location features.
- The new EZ-sensor streamlines the process, making it easier than ever to turn a profit with TPMS.

BEST PRACTICE - ALWAYS TEST THE SENSOR BY SELECTING MAKE MODEL AND YEAR, AND THEN ACTIVATING. DO THIS BEFORE INSTALLATION!
