Overview

A new button under updates has been added to the TPMS software called Recover Software. This is used to reinstall the last update.

Installing/Updating TPMS Desktop

What is a Recover Software button for on the TPMS Desktop?
If you need to reapply an update to a tool that has the latest software.

The “Update” button lets the end user know that there is a NEW update available

Using the “Recover Software” button in tool updating

1. Install TPMS Desktop from the Bartec Website
 - a. If you have TPMS Desktop already installed to your computer / Open “TPMS Desktop”
2. Select “ Update”
3. Place the tool in “Update Mode”
 - From the Home Menu
 - i. Select “My Tool”
 - ii. Select “Software Updates”
4. Install USB Lead to the computer / then to the tool

General Information

5. Click the “Recover Software” option if reapplying current software.
6. Click the “Update” button if installing NEW software to the tool.
- 7.
