★ **Schrader EZ-sensor 33500 single Sensor Programming**

Update will provide necessary code to program the NEW Schrader EZ-sensor 33500

Sensor features (according to Schrader sell sheet):

- Combines 314.9, 315 and 433 applications into ONE sensor
- Future proofed to support new and pending OE system technologies
- Achieves OE quality requirements
- Replicates OE functionality, including auto-locate technology
- Cover 92% of TPMS equipped vehicles

Software Update

SU-R53.1-015

Huf Intellisens

Huf Intellisens UVS3010 NEW sensor coverage.

Sensor features (according to Huf sell sheet):

1. New sensors bring us to the best coverage available in the market with only 3 sensors.
2. Sensors are programmable, reprogrammable in case of incorrect application, and copy clone capability.
3. Fastest programmable sensors in the market taking only 3 seconds to program.
4. All Huf sensors are backed by market leading 3 year warranty.

Improved QWIK sensor programming

To insure a seamless programming process, software was enhanced for better performance.

Model Year 2015 and 2016

Additional vehicle coverage to keep your tools current

Improved Corvette Relearn

With the 2014/15 Corvette being an Auto Learn (Drive) relearn process, on tool messaging has been updated to reflect this information.

Updated Bartec Splash Screen

The NEW Bartec logo, just in time for the PRO Series!
